- Single-part packaging ☛
- Easy product removal ☛
- Excellent stability ☛
- Best stackability ☛

← No cover needed

As a box for automation or manual setting up

Patented triangular edges

Patented stability lugs

A perfect fit, reliable locking prevents slipping during transport

★ Single-part packaging

MAISTAPACK® cartons are distinguished by their stackable, sturdy construction, which is patented due to its special features. No need for transport covers on the crates. They can be stacked really well and stably without wrappers. The products in the cartons remain undamaged.

★ Manual or mechanical setting up

MAISTAPACK® cartons are available for automated or manual setting up. Large batches can be set up mechanically, smaller ones by hand. Customised to suit your requirements.

★ Support sturdy and stable **stacking**

The **MAISTAPACK®** triangular locking edges system enables unusually sturdy stability and stackability. The patented top stacking corners and the matching recesses at the bottom enable crates to be composed for a perfect fit. Slipping during transport thus becomes impossible.

★ Suitable for automatic **palletising**

MAISTAPACK® cartons are perfectly suited for uncomplicated, automated palletising; they are stable, sturdy and safe during transport.

Helping to protect nature against tons of plastic film!

Clear-cut presentation at the POS

Products are easily removable

Image benefits/cost savings/environmental +

Quality mark with license number printed on the bottom

★ **Environmental benefits:** CO2 benefits of up to 30%

The ecological footprint of **MAISTAPACK**® cartons is up to 30% smaller compared with multiple-part packaging. Due to the stable locking system, the winding process is also substantially reduced. You save valuable working hours and up to 50% winding film. **MAISTAPACK**® solutions are efficient and take the ecosystem into consideration.

★ **Easy product removal** at the POS

MAISTAPACK® cartons offer excellent product presentation and removal at the POS. The stable construction of the packaging means that removal windows can be made larger. The displayed goods are presented in a clear-cut and appealing way, and are also easy to remove.

★ **Your cost and image benefits**

- No transport cover needed
- Saves up to 50% winding film
- Time savings in the winding process
- Less transport damage
- Premium product presentation at the POS
- Environmental benefits (*tons of plastic film can be saved*)

★ **Patented innovation**

The triangular locking edges system and the stability lugs are patent protected by **MAISTAPACK**®. These elements give the stackable cartons unique stability and allow for a perfectly designed product presentation. As a licensee, you enjoy the benefits of this innovation.
